WORK EXPERIENCE

05/2019 -

Full Stack .NET Web Developer

Current

BOLD BY DEVOTEAM - Altice Portugal

Working in the development of new functionalities and maintenance of the Altice brands customer portals (for example MEO, MOCHE and Altice Empresas).

Working with the following technologies: React | React Native | .NET Core | SQL Server | Microservices | C#

10/2017 -

Analyst

05/2019

Link Consulting

Development of solutions for banking and financial services sector.

Worked with the following technologies: C# | .NET | SQL Server | Outsystems | UiPath

EDUCATION

09/2015 -

11/2017

Master of Science Engineering Degree (MSc Eng) in Information Systems and Computer Engineering

IST - Instituto Superior Técnico

09/2012 -

07/2015

Bachelor's Degree in Computer Science

ULHT - Universidade Lusófona de Humanidades e Tecnologias

CERTIFICATIONS

11//2020 -
11/2023

CKAD: Certified Kubernetes Application Developer
Certificate ID Number: LF-71681p28l3

PROJECTS

Master Thesis: "Internet of Things as support for health insurance"

My master thesis consisted in developing a solution built in Outsystems that would use the inherent advantages of mHealth, IoT and wearable devices to analyze fitness and health data from the clients and produce some indicators with this data. Thus, health insurance clients have a greater knowledge of their health condition and insurers can make a more appropriate adjustment of the premium with the collected data.

Bachelor's Degree Final Course Project

My final course project was a Web App made in Node.js to control multiple Parrot AR.Drones 2.0 through an access point. The Web App detected if we were using a mobile device (like a smartphone) or a computer and showed the respective UI. In runtime you could choose whether you wanted to control a single drone at a time (and which one) or all the drones at the same time (synchronous flight).
